PART 1

1	Q	On Drawing (53711-7449534 Simulant, Explosive) neither the fiberglass shell for the filler E nor the urethane coating are referenced. Is this a change or an omission?
	A	<p>The MK 46 Filler E inserts should be made by using the supplied insert molds and a layup schedule of three (3)-1.5 oz multidirectional mats.</p> <p>The insert is then coated with Roof-tek 6000.</p>
